CYBER
INTELLIGENCE

Cyber Intelligence is a team of cyber security experts and thought leaders, serving businesses and organisations for over 10 years to improve their cyber security posture and maintain cyber resilience in an increasingly unpredictable threat landscape.

Understanding of potential cyber threats, new trends and attack patterns are extremely crucial in developing an effective human, operational and technical defence strategy. Our security programmes are carefully designed to empower our clients with security awareness and readiness to address attempts of breach into their organisation's safety.

Our core expertise is in Cyber Security Awareness Programmes, Cyber Range Services and Training. The team has a proven track record having served more than 200 clients and 30,000 employees internationally.
